Curacao, Bonaire, Saba & Sint Eustatius and Sint Maarten might be the new DXCC Entities resulting from the dissolution of the Netherlands Antilles that will take place on 10 October 2010

PJ2 - "We expect all operations to be accepted as of 10/10/10", John, K6AM says. "While ARRL approval is not 100% guaranteed, and may not be officially announced until all DXCC requirements are documented, plans are in place to mount several operations from the Signal Point super-station, PJ2T on **Curacao** beginning on day one". The first operation will be run on 10-18 October by a group led by K8ND. They will be followed closely by a team of nine operators from the U.S. and Germany who will be there through 2 November, including a M/M entry in the CQWW SSB Contest. Both PJ2/homecall and PJ2T will be in use during the 3-week run. Expect activity on all bands and modes. The station will be opened also to amateurs participating in the GAREC conference (11-12 October), as well as to any local Curacao amateurs who wish to operate from Signal Point during the post 10-10-10 week. [TNX K6AM]

PJ4 - A multi-national team of 15-20 operators is being formed to be active from **Bonaire** on 10-24 October "in anticipation of the new DXCC status on 10 October 2010". The current list of operators includes DJ8NK, DL9USA, K6AM, NOVD, PA3GVI, PA8A, PA8F, PE2KY, PE2MC, PG4M, PJ4GT, PJ4LS, PJ4NX, W0LSD, W4PA and WP3UX. They plan to be QRV on 160-10 metres SSB, CW and digital modes from six locations around the island. "Due to the time of year, 6 meters will not likely produce much activity", they say, "but it will be a consideration". The group has been granted use of Radio Netherlands relay station's "impressive aerial park, which provides up to 21 dBd gain, during their dead hours", i.e. between 12.30 and 18.30 UTC on a daily basis. They expect to utilize this opportunity on 30, 20, 15 and 17 metres. All of the QSOs will be confirmed automatically via the bureau through the services of Global QSL. Further information, updates and log search will be published on the expedition's website (www.bonaire2010.com). [TNX NOVD]

PJ6 - The Saba 2010 team has completed all preparations for the activation of **Saba** in October [425DXN 984]. Two teams, comprised mostly of members of the Southeastern DX Club (SEDXC), will operate over a two-week period (10-23 October) from two different locations on the island. Saba & Sint Eustatius should be one the new DXCC Entities resulting from the dissolution of the Netherlands Antilles: "this is not a 100% certainty", K4UEE says, but "it is likely enough to plan an operation". Bookmark www.saba2010.com for further information, updates, log search and QSLing instructions.

PJ7 - The website for the 10-20 October DXpedition to **Sint Maarten**, led by W8GEX and K9CT [425DXN 1002], can be found at www.stmaarten2010.com. They will work all bands CW, SSB and RTTY. [TNX W8GEX]

QSL

B4R/5 ● Please note that the QSL route for the recent B4R/5 activity from IOTA group AS-138 is via BA4TB (not BY4RSA, which is the ordinary route for contacts made with B4R). [TNX BA4TB]

EK6LP ● The QSL route is via RN4LP, direct only (Vladislav V. Lakeev, P.O.Box 208, Dimitrovgrad, 433512, Russia). As for LoTW, he says that a QSO will be uploaded to the system only after his receives "your e-mail request" or replies "to your paper QSL sent direct". QSOs made in contest "will be uploaded six months later". Bureau and eQSL cards will not be honoured. [TNX RN4LP]

QSLING CYPRUS STATIONS ● "The QSL bureau of the Cyprus Amateur Radio Society is receiving large numbers of QSLs that cannot be delivered to the intended recipient, because that station has a QSL manager outside Cyprus", Alan Jubb, 5B4AHJ (CARS QSL Bureau Manager) says. The problem is threefold: (a) those generating the QSLs are not bothering to check to see if the station has a manager; (b) even if a manager's call is written on the QSL, many QSL bureaux are still sending the QSL to Cyprus; (c) QSLs for calls 5B/DXcall are being sent to Cyprus when either they should be sent to the manager, or in the absence of a manager, they should be sent to the bureau for the home call. Alan has has produced a list of stations with foreign managers, which can be found at www.shacklog.co.uk/5BForeignManagers.htm

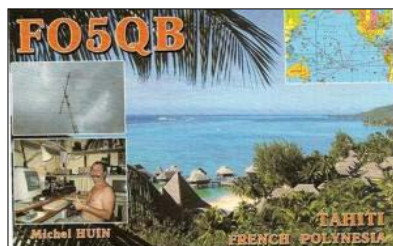

VIA VE1AL ● "I am ashamed to admit that I have found a box of QSLs that I thought had been sent via the bureau many years ago", Al, VE1AL says. "The cards are for QSOs with CY9DX, CY0DX, VE1AL and VF1L, plus a few for other callsigns I have used. I am integrating my 2010 QSLs for VE1AL with these cards and they should be in the mail to the bureau within the next few weeks. Well over 1000 QSLs are involved and I regret that many will probably be returned due to various reasons". All of Al's computerized logs have been uploaded to LoTW, "but that does not include the CY9 or CY0DX logs".

VIA W2OX ● "Alex, W2OX has all the old cards for V47KP, V48M, V47K that were sent to K2SB, which were unanswered by him as of August 18, 2010", The Daily DX reports. "Alex has all logs from 1989 to March of 2010", and he is in the process of sending out direct cards "as fast as he can". Bureau cards will follow. Direct requests should be sent to A. Aimette, P.O. Box 64436, Souderton PA 18964, USA.
